

Dutch Sarcoma Group

Program DSG research symposium 2025

9.00	Coffee and registration
9.30 - 11.00	General assembly (ALV)
11.00 - 11.15	Coffee break
11.15 - 12.30	Scientific program morning
1115 W. van Houdt	Update STRASS2 & NEOASIS study
1130 A. Vennik	Distal Humerus Reconstruction after Tumor removal
1136 C. Curioni	Wound Complications after Soft Tissue Sarcoma Resection: A Single-Centre Retrospective Analysis
1142 S. Hakkesteegt	Patients with atypical lipomatous tumors initially treated with surveillance: a cohort study.
1148 M. Makdis Mouso	Body image, Health-related Quality of life, and Function after Soft Tissue Sarcoma Resection: A Study Protocol
1154 I. Makame	The GALLOP project: monitoring GIST patients using circulating tumor DNA
1200 L. Kist	Correlation between the results of bone marrow biopsy and FDG-PET-CT or WB-MRI at diagnosis in a retrospective cohort of patients with Ewing sarcoma (CONCORD retrospective study)
1206 Z. Erdem	On the Quest for Prognostic Biomarkers in Chordoma: Integrating Genomic, FISH, and Immunohistochemical Approaches
1215 V. Miladinovic	MRI and [18F]FDG-PET responses of sacral chordoma tumors during and after proton beam therapy: first results of a prospective chordoma proton therapy (CHIPT) study
12.30 - 13.30	Lunch break

13.30 – 14.30

Scientific program afternoon part 1

- 1330** E. Holthuis The Prediagnostic General Practitioners Pathway of Gastrointestinal Stromal Tumor Patients: a Real-World Data Study.
- 1345** T. van Amerongen Patient and Tumor Factors Influencing Length of Diagnostic Trajectory Intervals in Gastrointestinal Stromal Tumors and Their Impact on Health-Related Quality of Life: A Dutch Multicenter Cross-Sectional Study
- 1400** M. Nederkoorn Effect of standard neoadjuvant radiotherapy on immune cell infiltrates in myxofibrosarcoma
- 1415** C. Scholte The risk of pathological fractures after intralesional curettage in Atypical Cartilaginous Tumours: a retrospective cohort study

14.30 – 14.45

Coffee break

14.45 – 16.15

Scientific program afternoon part 2

- 1445** J. van Sabben Neurocognitive events limit efficacy of avapritinib in GIST patients: real-world experience
- 1451** G. Krebbekx Are osteoarthritis-related gait parameters present in rotationplasty patients?
- 1457** P. van Oosten Long-term results and health-related patient reported outcomes after vascularized fibula graft reconstructions for long bone resections of malignant tumors
- 1503** G. Foppele Development and the need for implementation of a Health-Related Quality of Life measurement strategy for Patients with Soft Tissue Sarcoma undergoing Preoperative Radiotherapy
- 1509** G. Foppele Balancing the Dose: A Meta-Analysis of Preoperative Radiotherapy Strategies for Soft Tissue Sarcomas
- 1515** M. Duivenvoorden Indications for Denosumab Use in GCTB and Long-Term Application
- 1521** M. Duivenvoorden It may be relatively safe for patients with GCTB in child bearing age to be on Denosumab
- 1527** S. Hakkesteegt Local non-surgical techniques in the treatment of desmoid tumors: when, who and what?
- 1533** I. Skornja Treatment Success Rate Following Surgical Management of Periprosthetic Joint Infections in Oncologic Proximal Tibia Reconstruction
- 1545** S. van Ravensteijn Cemiplimab in locally advanced and/or metastatic secondary angiosarcomas (CEMangio): A phase II clinical trial.
- 1600** J. Groen Patient association presentation
- 1615** Wrap up

16.15

Drinks
